

The AI Fluency Framework

Four interconnected competencies necessary to ensure our interactions with AI are effective, efficient, ethical and safe.

The 4D Framework

Delegation	Setting goals and deciding whether, when and how to engage with AI.	Description	Effectively describing goals to prompt useful AI behaviors and outputs.
Discernment	Accurately assessing the usefulness of AI outputs and behaviours.	Diligence	Taking responsibility for what we do with AI and how we do it.

Key Concepts

Three Modes of AI interaction:

- **Automation:** AI executes specific tasks based on human instructions
- **Augmentation:** Humans and AI collaborate as thinking partners
- **Agency:** Humans configure AI to independently perform future tasks on their behalf

AI Fluency means interacting with AI systems in ways that are effective, efficient, ethical and safe

The Delegation, Description, Discernment, and Diligence Competencies are interconnected collections of skills, knowledge, insights, values
